

THE PRESIDENT'S EMERGENCY PLAN FOR AIDS RELIEF (PEPFAR)

PARTNERSHIP FOR AN AIDS-FREE GENERATION

The U.S. President's Emergency Plan for AIDS Relief (PEPFAR) proudly supports Mozambique's fight against HIV/AIDS. With an adult HIV prevalence rate of 11.5%, Mozambique is one of PEPFAR's 15 priority countries. To date, Mozambique has received approximately \$1.9 billion in PEPFAR funding. These investments support evidence-based interventions in pursuit of an AIDS-free generation, including HIV testing and counseling, voluntary medical male circumcision, the provision of antiretroviral treatment, clinical and community-based care for people living with HIV/AIDS (PLWHA), and more.

FY13 PEPFAR Allocations to Mozambique

Treatment	\$63,718,849
Care	\$37,297,623
Prevention	\$97,994,848
Health Systems Strengthening	\$35,115,643
Total	\$234,126,962

Budget totals exclude operations allocations.

HIV/AIDS in Mozambique

Population: 24,366,112
Living with HIV: 1.6 million
HIV prevalence (adult age 15-49): 11.5%
Male: 9.2%
Female: 13.1%
HIV prevalence (youth age 15-24): 7.9%

PEPFAR Mozambique

Partnership for an AIDS-Free Generation

PEPFAR Mozambique supports Mozambique's National Strategic Plan through the Partnership Framework Implementation Plan. The Governments of Mozambique and the United States collaborate to strengthen Mozambique's national HIV/AIDS response through the following principles: government commitment and ownership, coordination, decentralization, health system strengthening, transparency, accountability and results-based management.

PEPFAR implementation is managed by committed American and Mozambican technical staff from the U.S. Centers for Disease Control and Prevention (CDC), the U.S. Agency for International Development (USAID), the Department of State (DOS), the Department of Defense (DOD), and staff and volunteers of the U.S. Peace Corps (PC). Together with hundreds of local and international partners across Mozambique, men and women work to prevent new infections, provide treatment to those already ill, and support those affected by HIV and AIDS.

PEPFAR Funding in Mozambique

PEPFAR represents the largest commitment by any nation to combat a single disease internationally. PEPFAR investments help alleviate suffering from other diseases across the global health spectrum. PEPFAR is driven by a shared responsibility amongst donor and partner nations.

PEPFAR Mozambique is strategically aligned with the Global Health Initiative (GHI), which has a core focus on health outcomes for women and girls. In conjunction with PEPFAR programs already in place, the GHI strategy aims to reduce maternal, neonatal, and child mortality by focusing on the empowerment of women and their health.
